

Cut-Off Relay 2-gang DRA with auxiliary input

Order No.: 0861 00

Installation

The cut-off relay 0861 00 is designed for installation on 35 mm top-hat rails and in switch cabinets. After installation, all cable connections must be made in accordance with the terminal diagram.

Important: During connection, the relevant VDE requirements, especially DIN VDE 0100/0700, the applicable regulations of the local power supply company and the accident prevention regulations are to be observed.

Operation

The cut-off relay 0861 00 is used for the simultaneous control of two drives.

Note: Individual operation is only possible with mechanically and electrically locked push buttons. All devices with 230 V output and 2-minute pulse would be suitable as a controller. As long as a central command is active, no individual operation is possible.
